Professional Summary

Computer Science undergraduate and aspiring Software Engineer with experience in full-stack and backend development using Java, JavaScript, React.js, Node.js, Express.js, MongoDB, MySQL, and REST APIs. Proficient in Data Structures Algorithms, OOP, DBMS, algorithm design, time and space complexity, and computational optimization. Built secure, scalable web applications featuring JWT authentication, role-based authorization, real-time communication, and database-driven REST APIs.

Education

IMS Engineering College

October 2023 - July 2027

Bachelor of Technology in Computer Science Engineering Ghaziabad, Uttar Pradesh

Projects

SyncParty

GitHub | Live

React.js, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS, JWT

- Built a full-stack MERN application with synchronized YouTube playback and real-time chat using Socket.IO, supporting 10+ concurrent users.
- Implemented JWT authentication, password-protected rooms, and RBAC across 2 user roles (Host and Participant), with 4 MongoDB data models.
- Created a responsive React.js + Tailwind CSS interface with dark mode, room management, and real-time event handling across 3+ core features.

FoodCare

GitHub | Live

React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, JWT, REST APIs, GeoJSON, Vite

- Architected a full-stack MERN food redistribution platform connecting 3 user roles: restaurants, NGOs, and volunteers.
- Secured REST APIs with Express.js, JWT, RBAC, and Socket.IO, enabling real-time donation updates across 3 role-specific dashboards.
- Integrated MongoDB GeoJSON geospatial queries into a 4+ stage workflow covering donation creation, NGO matching, pickup, and delivery.

AI Interview Coach

GitHub | Live

React.js, Vite, Node.js, Express.js, REST APIs, OpenAI API, MongoDB, JWT, bcrypt, MongoDB Atlas

- Designed a full-stack MERN AI Interview Coach integrating the OpenAI API for 3 core AI features: mock interviews, question generation, ATS.
- Implemented an AI evaluation system across 5 performance metrics: correctness, technical depth, completeness, relevance, clarity.
- Configured secure REST API workflows using JWT and bcrypt with MongoDB Atlas, enabling analytics and 7-day improvement plans.

Technical Skills

Languages: Java, JavaScript, TypeScript, C, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, EJS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, Socket.IO

Databases: MongoDB, MySQL, MongoDB Atlas, Mongoose, Prisma, Database Design

Authentication: JWT, Role-Based Access Control (RBAC), GitHub OAuth, bcrypt

Tools: Git, GitHub, VS Code, Postman, IntelliJ IDEA, Vite

Core CS: Data Structures Algorithms (Java), Object-Oriented Programming (OOP), Database Management Systems (DBMS), OS, CN

Certifications

- Exploratory Data Analysis - NASSCOM | 2026

- Full Stack Development with MERN - NASSCOM Foundation | 2026
