Professional Summary

Computer Science undergraduate with hands-on experience building full-stack web applications using React, TypeScript, Node.js, Express.js, MySQL, and Prisma. Seeking Software Engineer and Full-Stack Developer roles, with a strong foundation in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and problem solving. Built AI-powered developer tools with secure authentication, GitHub integration, and reliable backend workflows.

Education

IMS Engineering College
B.Tech in Computer Science Engineering

October 2023 – July 2027
Ghaziabad, Uttar Pradesh

Projects

SyncParty – Real-Time Synced YouTube Watch Platform

[GitHub](#) | [Live](#)

React.js, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS, JWT

- Built a full-stack MERN watch-party platform with synchronized YouTube playback and real-time chat.
- Implemented JWT authentication, password-protected rooms, and role-based access control for hosts and participants.
- Designed MongoDB persistence for users, rooms, chat history, and collaboration data to support reliable multi-user sessions.
- Developed a responsive React and Tailwind CSS interface with dark mode, room management, and real-time Socket.IO events.

Food Waste Management System

[GitHub](#) | [Live](#)

React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, JWT, REST API, GeoJSON, Vite

- Developed a real-time food waste management platform connecting restaurants, NGOs, and volunteers to streamline food donation and redistribution.
- Implemented JWT authentication, Role-Based Access Control (RBAC), REST APIs, and Socket.IO for secure access and real-time donation and status updates.
- Built geospatial food matching using MongoDB GeoJSON, enabling NGOs and volunteers to discover nearby available food donations efficiently.
- Designed an end-to-end donation-to-delivery workflow with real-time notifications, status tracking, and role-specific actions for restaurants, NGOs, and volunteers.

Forkfu-Food Web

[GitHub](#)

React 19, Redux Toolkit, React Router, JavaScript, HTML5, CSS3, Vite

- Developed a responsive food-ordering application using React, Redux Toolkit, and React Router.
- Implemented menu search and filters, cart management, checkout validation, authentication, and editable user profiles.
- Created user-specific order history and persistent cart and account data using Local Storage.

Technical Skills

Languages: C, Java, JavaScript; Data Structures and Algorithms with Java

Frontend: React.js, Tailwind CSS, HTML5, CSS3, EJS, Responsive UI Development

Backend: Node.js, Express.js, REST APIs, Socket.IO

Databases: MongoDB, MySQL, Database Design, Persistent Storage

Authentication: JWT, GitHub OAuth

Tools: Git, GitHub, VS Code, Postman, IntelliJ IDEA

Coursework: Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
